

CYBER RECONX - SECURITY INTELLIGENCE REPORT

Generated: 2026-05-22 15:28:04 (UTC)

Scan Class: Reverse Image Intel

METRIC	VALUE
Threat Severity Level	Low
Security/Threat Score	15 / 100
Target Address/Details	test_payload.png

SECURITY FINDINGS & METRICS SUMMARY

Analyzed uploaded image test_payload.png. Perceptual dHash: 0000000000000000. Camera: N/A. GPS Coords: N/A.

CYBER DEFENSE & REMEDIATION STEPS

- Use metadata scrubbers (e.g., exiftool) to purge EXIF tags from public images.
- Disable GPS/location tagging in camera settings when taking sensitive operational photos.
- Watermark original assets to prevent visually matching clones from being registered in other domains.
- Audit public repositories (GitHub, Unsplash, Flickr) to verify image footprint leaks are authorized.

CONFIDENTIAL DOCUMENT: Intended only for system owners and verified authorized security review presentation. No real target was subjected to unauthorized scanning during compilation.
